Want Ads Pay Big

They Cost a Trifle

How Our Taxes are Used

Some complaints have been made regarding the taxes levied by the town and the question quite frequently asked "what becomes of the money we pay for taxes?" The following figures show quite clearly the financial efficiencies the town council are forced to face each year.

In the year 1928 the total tax levied will be \$54450.00

How it is used:

The School required in 1928.....	\$31,760
It requires for water works and sidewalk bonds.....	5,700
It cost for street lights.....	2,000
It costs for irrigation water.....	1,050
It costs for mothers' pensions.....	1,500
It costs for town marshal.....	1,500
It costs for water engineer.....	1,400
It costs for utility man.....	1,000
It costs for secretary-treasurer.....	1,400
It costs for medical health officer.....	300
It costs for town solicitor.....	300
It costs for auditor.....	225
It costs for coal, telephone, printing, etc.....	750
It costs for repairs to culverts, streets, ditches, sidewalks etc.....	5,585
Total.....	51,450

The Town collects sufficient money from the water works to pay for the maintenance and electricity used in pumping the water.

Winter Sports

The season of winter sports is again at hand, the season Raymond looks forward to with great anticipation. The old basketball suit will soon be given its annual airing preparatory to a busy season; baskets will be put up, and floors put in shape. But what of the other winter sports?

It seems to us that our winter sports are narrowly limited, that we are neglecting some of the very best branches, for the sake of basketball. True, we are this year defending two provincial championships, and we announce our very serious intention of putting up a fight for the third, intermediate, cup, but we have every available opportunity for drawing in every bit of material in our town, that is in the least athletically inclined. What are we going to do in hockey? Get out your skates folks have them ground and tightened up. Patch up the old hockey club; organize a gang to put the rink in condition before the severe weather comes, provide some warm place for changing shoes for skates, and then talk up the idea of a real town league and team. The M. Men's organizations would do well to lead out in this more.

What about an indoor baseball league? Why not draw up a schedule of games between the Business Men, Sugar Factory, High School, Agriculture School, and Farmers? This game can be played in the Opera House, or in the High School Gym. Quite successfully and would provide endless fun and exercise for those so unfortunate as to be unable to indulge in basketball and hockey.

We must not forget the boxing and wrestling championships. Raymond must come to the front in these sports. We have a wealth of material and unlimited accommodations for both of them. We also have with us this year a champion in both lines, who would only be too pleased to help polish the young fellows into shape for the tournaments.

All voters not listed as rate-payers must be registered on or before the 31 day of October or their names will be omitted from the voters list.

The marriage of Miss Ethel Palm to Mr. Ingvald Flexhaug was solemnized at Lethbridge last Monday with Rev. Fairney officiating. The young couple will reside in Raymond.

News Notes

Tuesday morning the large pulley on the main drive shaft broke stopping all operations on the beet end of the factory.

Owing to the quick work of the mechanics in charge, the huge engine was shut down before any further damage was done. If for any reason, this had not been done the engine would have run away, and if sufficient speed had been attained the fly wheel would have exploded, owing to the immensity of the centrifugal force much damage would have been done.

A new pulley has been ordered, to come by express, from Calgary.

Electric motors were installed on the centrifugals, and the sugar end of the mill continued.

Remember the dance at the Opera House Saturday night, with King's Kamadians in attendance.

Mrs. J. D. Collett left here last Tuesday for Banff, where she will spend the winter with her son, S. Duncan, editor of the Crag and Canyon newspaper at that point.

Beet raisers throughout the district took advantage of the brief good spell of weather and a goodly number of beets were dug and delivered. It is interesting to note the number of trucks hauling beet this year. In future years let us hope that road conditions and weather will permit more extensive use of this method of transportation.

Although the storm of last week end delayed the digging, sufficient beets were in the sheds to keep the factory going, and maintain a surplus of five thousand tons, when the present storm came.

The Progress of Canada

Canada is forging steadily, even rapidly, to the front among the nations of the world. In all things material it is making great growth. Its trade, both domestic and foreign, is expanding as never before, and as a result every branch of industry is active. The country has just harvested one of the largest crops in its history, mining discoveries and operations are proceeding on an unprecedented scale, factories are working overtime, building operations in all provinces are reaching totals hitherto unrecorded, with the result that employment is general, wages good, and population increasing.

Important and gratifying as this material growth and prevailing prosperity is to our people, a much more vital matter to Canada is whether the Dominion is likewise making progress in those other directions which are essential to the upbuilding of a nation in the truest sense. Are the Canadian people becoming merely a nation of money-seekers, measuring their success in terms of dollars and statistics recording economic development and growth, or are they utilizing the larger advantages and increased power which material prosperity is conferring upon them to encourage and develop those traits and characteristics which stamp a people as truly advancing to greatness?

We believe signs generally point to the fact that the people of Canada are, taken as a whole, more intensely interested today in the spiritual, intellectual, moral growth of their country than at any previous period; that, in fact, they are deeply concerned, and very determined that the national ideals and character shall be maintained at a high level.

The widespread interest in and discussion of the subject of immigration is but one manifestation of this spirit. Considered solely from a material standpoint it would probably pay Canada to enormously increase its population just as rapidly as possible. Economically Canada would probably gain by absorption by the United States. But Canadians are insistent that quality rather than quantity shall be the governing factor in our immigration policy, and it would be hard to muster a corporal's guard of outstanding men who favor the policy of United States annexation.

Throughout Canada increasingly sympathetic attention is being given to the assimilation of the non-British peoples within our borders into the Canadian family. Here and there people may adopt an unfriendly and unfair attitude towards these people, and to that extent retard the good work, but they are exceptions to the generality of Canadians. More and more it is being realized that these people are making a real contribution to the national life of Canada, bringing to us music, poetry, traditions and handicrafts which are enriching this Dominion.

The increased attention being given to musical festivals and symphony orchestras, to the establishment of art galleries and museums, to scientific research, to literature and the rapidly increasing number of libraries, and to the steady improvement in Canadian magazines and publications of a better class, all go to prove that the people of Canada are not wholly materially minded.

The wonderful success which has attended the application of co-operative principles in the solution of production and marketing problems, and in the provision of public services for the use of all the people, is having its inevitable effect upon the minds of all people. To an ever increasing extent they are beginning to realize that if through loyal co-operation they can remedy material evils and advance their individual and corporate welfare, through the acceptance of the same principles and their application to all phases of community, provincial and national life they can greatly advance the welfare of the country as a whole.

Co-operation is better than competition or antagonism. Sympathetic consideration and helpful co-operation is better than hatred and the maintenance of bitter animosities. In the practical work of co-operation the Canadian people are learning that there are two sides to almost every question, that people who may differ with you are just as sincere as you are, that the road to ultimate success and the greatest good to the greatest number lies along the path of friendly compromise rather than in continual enmity and warfare.

Canada's progress is, therefore, a well balanced progress, and because of this gratifying fact the people of the Dominion may look to the future of this very gratifying fact the people of the Dominion may look with unbounded confidence to the future if their great country.

A Railway Revolution

Train in England Electrifies Line as it Travels

A train which has puzzled many people has been running over a portion of the L.M.S. railway in England, says an article in "Answers."

It looks like an electric train, and

Make it your happiest holiday. Your friends and relatives will be happy too. White Star ships offer a most enjoyable trip both ways.

To Aid Farm Workers

Clearing House to Furnish Winter
Farm Employment May be
Established

While no definite decision has been reached yet, a central clearing house, from which British winter-harvesters will be furnished winter employment may be located in Regina. The establishment of such a bureau, though not necessarily in this city, is expected to be the outcome of a conference held at the Parliament Buildings, Regina, on September 12, attended by representatives of the Federal and Provincial Departments of Colonization, those of the two great railways, the Government Labor Service and the United Farmers of Canada, Saskatchewan section.

RHEUMATIC MISERY

Relief Can Only Come Through
Better Blood—Liniments
of No Use.

In no other disease does the blood become thin so rapidly as in rheumatism. Not only does it become thin but it is loaded with impurities—rheumatic poisons. Without the proper treatment these poisons increase, the inflamed joints swell and the patient becomes a cripple. Most treatments simply aim to keep down the pain, hence with every unfavorable condition a renewed attack follows.

To cast out rheumatism the blood must be enriched and the rheumatic poisons driven out with the natural secretions of the body. This can best be done through a course of Dr. Williams' Pink Pills, which have a specific action on the blood, giving it new richness and redness. Thousands have tried this treatment with beneficial results. That every sufferer from rheumatism who does not try Dr. Williams' Pink Pills is neglecting the most hopeful means of recovery is shown by the statement of Mr. David Carroll, Picton, N. S., who says:—"For years I was troubled with rheumatism. The pains were not continuous, but they always returned, and kept getting worse. I tried so-called electric belts and many medicines, but did not get more than temporary relief. Only those who have suffered from this trouble will realize what I suffered at times. I had begun to despair of getting better when a friend urged me to try Dr. Williams' Pink Pills. In a short time I could feel this medicine helping me so I gladly continued taking the pills and soon found that every trace of the trouble had disappeared and there was a great improvement in my general health. It is now two years since I took Dr. Williams' Pink Pills and I have not had the least twinge of the trouble in that time. That is why I confidently recommend the pills to other sufferers."

You can get these pills from any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Company, Brockville, Ont.

Kritik—Do you think you've improved "Richard III" much by rewriting it?

Playsmith—Sure. It was way out of date. For instance, where Richard hollers, "A horse! A horse! My kingdom for a horse!" I have him shout, "A plane! A plane! My dictatorship for a plane!"

The Poor Man's Friend.—Put up in small bottles that are easily portable and sold for a very small sum, Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

Twenty years ago half of the population of 200,000,000 women and girls in China had crippled feet, but today almost every village has a women's shoe store which displays an attractive array of footwear.

For years Mother Graves' Worm Exterminator has ranked as a reliable worm preparation and it always maintains its reputation.

If a huge cistern, large enough to cover Trafalgar Square and as high as Nelson's column, were built as a water-tank, London would empty it twice daily.

CUTICURA HEALS SKIN TROUBLE

Sore Eruptions Broke Out Over
Face, Itched and Burned.

"My trouble began with little, sore eruptions which broke out all over my face. They itched and burned so that I always wanted to be scratching, and when I scratched them they got larger and then dried up. Some nights I could not sleep very well."

"I tried other remedies but they did not help me. I had the trouble over five weeks when I began using Cuticura Soap and Ointment, and in two weeks I was healed." (Signed) George W. Herchuk, Box 55, Chipman, Alta., Oct. 8, 1927.

Daily use of Cuticura Soap, with touches of Cuticura Ointment as required, keeps the skin fresh, smooth and clear. Cuticura Talcum is an ideal toilet powder.

Sample Each Free by Mail. Address Canadian Depot: "Stichens, Ltd., Montreal." Price, Soap 25c, Ointment 25c and 50c, Talcum 25c. Cuticura Shaving Stick 25c.

BEAUDRY LEMAN, General Manager
Banque Canadienne Nationale

Director Shawinigan Water and Power company; Montreal Tunnings company, and Asbestos corporation. Born, Montreal, Jan. 2, 1878, son of Dr. Joseph Beaudry Leman. Educated Mount St. Louis College, private tutor, University of Lille, France, McGill University, Mayor of Shawinigan Falls, Que., from 1901 to 1907; member Electric Service commission, Montreal. Married to Caroline Beique, daughter of Hon. F. L. Beique, May 12, 1908. Have three sons and two daughters. Address 597 St. Catherine Road, Outremont, Quebec.

Junior League of British Nations

Proposal to Form Branch of British
Empire Parliamentary
Association

To the British Empire, at least, it would be a real junior league of British nations," stated M. A. MacPherson, M.L.A. for the Regina constituency, when speaking of the proposal of the government of Saskatchewan to consider the advisability of forming a branch of the British Empire Parliamentary association.

The Regina member further expressed his opinion that such an organization, having as it does, the aim of trying to bring the different nations and colonies of the British Empire into closer understanding and contact with each other, would most certainly be a splendid one for the province to adopt.

It is proposed that at the next sessions of the legislatures of the four provinces of Ontario, Saskatchewan, Alberta and Manitoba, this scheme be presented to the members of the respective assemblies and with their approval, the work of organizing such an association be definitely undertaken.

The Oil for the Farmer.—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

Canadian Amateur Golf Championship

Will Be Held at Jasper Park Lodge
Next Year From August
19 to 24

Authentic information was received at Jasper National Park by the visiting Senior Golfers from Great Britain that the United States National Amateur golf tournament will be held next year over Pebbles Beach, Calif., from September 2 to 7. With these dates now definitely assured it is also possible to state positively that the Canadian Amateur championships will be held over the Jasper Park Lodge golf course, next year from August 19 to 24. The defining of these two important dates in the golfing program for 1929 leaves an interval of a full week between the Canadian and U. S. Amateur events and it is more than likely, therefore, that the Canadian championships will attract a large number from the gallery of stars in the United States and other countries who will be westward bound for the U. S. event. Should these hopes be fulfilled, and every effort is to be made by the Royal Canadian Golf Association and the Canadian National Railways to bring them to fruition, the 1929 Canadian Amateur championship will be the greatest event in the history of golf in Canada.

Tombstone Dealer (after several futile suggestions): How would just a simple "Gone Home" do for an inscription?

The Widow: I guess that will be all right. It was always the last place he ever thought of going.

Speaking of serious reading, how is this from the bank, "Your account is overdrawn."

How French Police Work

Use Soundless Whistles to Give
Alarm to Headquarters

Police in most of the large French towns can summon help without being heard. They are supplied with whistles whose notes are far too high-pitched for the human ear to detect. These inaudible sound waves are picked up by microphones skillfully camouflaged throughout the city, and an alarm is flashed to central police headquarters.

A policeman who sees a burglar at work can summon reinforcement without alarming the suspect. He can, too, direct the sending of aid in Morse code by using the soundless whistle.

Good-bye Asthma. Persons suffering from that extremely trying trouble known as asthma know what it is to long with all their hearts for escape as from a tyrant. Never do they know when an attack may come and they know that to struggle unaided is vain. With Dr. J. D. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

What would really have settled the whole thing is for Mr. Kellogg to have written into his peace pact that no nation engaged in war could borrow money of the United States.

A torch has been devised that can cut steel in a sunken ship at any depth.

Becoming Great Industry

Tourist Trade Is Not Far Behind
Wheat Exports

The Federal bulletin, *Natural Resources*, puts in a graphic way the importance of what it describes as "a new giant of Canadian business," being the second among five. These are Canada's wheat exports, valued last year at \$399,624,000, expenditure of tourists from abroad estimated at \$275,000,000; mineral production, \$244,520,000; pulp and paper mills, \$219,328,000, and building permits, \$181,613,000. A few more years and our tourist trade will be our greatest asset!

Mrs. Littleflat—Tilly, you've left my lingerie scattered all around this room and I'm expecting company any minute.
Tilly, the Maid—That's all right ma'am, I'll keep my eye on 'em and see they don't pinch nothin'.

The House of Lords, England, may transact certain business when there are only three members present, not necessarily including the Lord Chancellor.

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

Woodpeckers and literary critics make their living by picking holes in things.

ASPIRIN

The whole world knows Aspirin as an effective antidote for pain. But it's just as important to know that there is only one genuine Aspirin. The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any drugstore—with proven directions.

Physicians prescribe Aspirin;
it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Reward and Garnet, New Wheat Varieties, Now Holding Attention of Western Growers

Mr. L. H. Newman, Dominion Cerealist of the Experimental Farm, returned to the East recently from an extensive tour of Western Canada. During the trip practically every wheat growing area was visited. Mr. Newman states that the newer wheats, Reward and Garnet, are holding the attention of the western growers.

Some 467 farmers are this year testing Reward wheat. The variety is reported to have done well, though actual figures on yield, etc., have not yet been compiled. Mr. Newman stated that it had been impossible to determine anything definite with regard to this variety's rust resisting qualities because there was practically no rust in Manitoba and very little elsewhere. Conditions generally in the west Mr. Newman describes as distinctly above the average.

Particularly good are the reports on Garnet wheat, one of the originations of the Experimental Farm. Writing on the subject of this remarkable wheat early this year, the Dominion Cerealist stated "the history of Garnet wheat is almost an epic in the realm of scientific achievement. It reveals a story of almost half a century of patient but determined effort, replete with discouragements and disappointments but rewarded ultimately by definite and indisputable gains."

In 1914 Garnet wheat was included in the regular variety test-plots at the Experimental Farm. In 1919 it was tested at the Experimental Farms in the Prairie Provinces. In 1925 the branch farms were able to sow 320 acres, from which was produced about 9,700 bushels.

In 1926, some 6,954 bushels of Garnet seed were offered to prairie farmers, with a four-bushel limit. Some 2,326 farmers, including 862 soldier settlers, secured two to four bushels lots and this, together with seed from increasing test samples by two or three seed growers, made a grand total of some 14,000 bushels, or enough to seed 12,000 acres.

This year Garnet wheat was observed growing in all parts of the west. The section east of Prince Albert and north of Tisdale is practically a Garnet country. It is an early maturing variety, and produces a high proportion of grain to straw. This season serious frost in Saskatchewan on August 22 damaged the immature wheat, but Garnet demonstrated its ability to mature before the frost. It usually ripens a day or two before Ruby, from six to twelve days ahead of Marquis, and three or four days before Reward. This variety has also behaved well under drought conditions.

In 1903 it was reported wheat would never grow in the Peace River country. This year Garnet was being cut here on August 21. Crops were more advanced in the Peace River district than further south, and some of the west's finest crops were seen there. Dr. J. H. Grisdale, Deputy Minister of Agriculture, and Mr. L. H. Newman, driving through the Rio Grande section of the Peace River on August 22, were able to identify 31 varieties of wheat, and of these 16 were Garnet, 7 Marquis, 5 Huron, 1 Turkey Red, 1 Ruby and 1 Reward.

This indicates the way in which Garnet wheat is spreading in the west. As an early maturer and good yielder, it has, no equal, and once more the Experimental Farm Branch of the Dominion Department of Agriculture must be credited with an epoch-making contribution to Canadian agriculture.

Life Guard—"How much can you carry?"

Mere Man—"Two hundred pounds."

Life Guard—"Suppose there was a woman out in the water drowning and she weighed four hundred pounds. How could you save her?"

Mere Man—"I'd make two trips."

"With this awful snow I cannot hide from my wife that I have been drinking!"—Felix Mele, Paris.

W. N. U. 1754

WEDDING OF SOCIAL PROMINENCE

Hon. Robert Forke, minister of immigration, has just announced the marriage of his daughter, Ethel May, to Charles J. McFarland, formerly of Los Angeles and now of Vancouver, the marriage having taken place in Vancouver recently.

Winnipeg Newspaper Union

Looking Slender
An unusual one-piece dress, cleverly designed to make its wearer appear more slender, with panel front perforated to be cut apart to use contrasting fabrics or colors, as illustrated. A narrow belt, attached at either side of front panel, holds in fullness through the waistline and lies in youthful bow at back. The shaped collar is smart, finishing the flattering square neckline. Style No. 224 is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust, and if made of one material, only takes 3 3/4 yards of 40-inch. Printed and plain silk crepe, crepe satin using the two surfaces, printed and plain shantung, printed and plain linen, two tones in flat silk crepe, jersey, sheer woolsens or canton-faille crepe are usually pleasing combinations. Pattern price 25 cents in stamps or coin (coin preferred.)

We suggest enclosing 10 cents additional for a copy of our Fashion Magazine.

SCOFF AT TITLES

Whether Lady Cynthia Mosley and her husband, Sir Oswald Mosley, Labor M.P. for Smithwick, England, will accept the baronetcy made vacant by the death of Sir Oswald Mosley is a matter of conjecture. Both scoff at titles. Lady Cynthia is the second daughter of the late Marquis Curzon.

Fort Churchill Harbor

Expropriation Proceedings Under Way to Secure Property

Preliminary arrangements for expropriation proceedings in regard to property at Fort Churchill are under way in Ottawa. Judge H. A. Robson, of Winnipeg, is acting for the Dominion government and the private owners are the descendants of William Beach, well known Winnipeg old-timer who was so ardent a believer in the Fort Churchill terminus to the Hudson Bay Railroad that he bought a large tract of territory at this point many years ago.

The Beach estate owns the narrow strip of land running between the harbor and the sea and it is along the inner shore of this peninsula that the harbor works are being constructed.

Hon. Chas. Dunning decided last year, when Churchill was selected as the port, that no private interests should be allowed to own land there at present, and expropriation proceedings accordingly were begun.

Planning Western Air Mail

Ottawa, Ont.—Western Canada is practically assured of an air mail service next year. The officials of the Post Office department are putting the finishing touches to their policy which will be recommended to Hon. Peter Veniot, Postmaster-General, and probably by him to the cabinet and parliament.

"Jack, does your wife drive a car all over now?"

"You guessed it, Bill, sideways and all."

Wrong Impression of Canada

English Paper Gives Weird Account of Primitive Conditions

The woman's page editor of the Vancouver Province says: "There isn't a Canadian who at some time or other doesn't bemoan the fact that Canada is regarded at the 'Land of Beyond' by English people. Nearly every person has some amusing story to tell of an Englishman who came to Vancouver looking for bears, or Indians, or who showed surprise at the discovery that this country is in no way different from any other as far as conveniences are concerned."

"It is somewhat surprising to pick up a well-known English daily and see in staring headline, 'A Bridge Party in West Vancouver: How an English Hostess Makes the Best of Her Primitive Home in the Wilds.' And there follows a long account of a trip to the wilds of West Vancouver to a harmless bridge party where the guests regaled themselves on sandwiches, seated on packing boxes or beds."

"No one would argue about the truth of the affair. It may be so, but why a resident of British Columbia should undertake to send items to England stressing the primitive state of this part of Canada is not understandable. So, perhaps, our education needs to start at home, before we try to impress our importance on other countries."

"Charley Paddock, the famous sprinter, is said to be the world's fastest human being."

"Don't forget Cleopatra. She had a mark that's not to be scoffed at."

THE FIRST MOOSE TROPHY

Bringing out with them the first moose shot in opening of the 1928 hunt. Mrs. Oscar Hock, of Miami, from La Tuque, Que., at successful hunt in the Vermilion fitter Armand Tremblay. Shows How British Columbia Was Retained For Canada By Work of Early Pioneers

Wintering Bees Outside

Tells How Bees Are Successfully Wintered Out-of-Doors

At the Central Experimental Farm at Ottawa a large number of colonies of bees are successfully wintered out-of-doors each year. In his report for 1927, the Dominion Apiarist tells how the bees are protected and fed. The cases used are four-colony and two-colony and single cases are also used. In packing, planer shavings are used of which three inches is placed under the hives, four or five inches about their sides, and six inches to eight inches on the top. Thirty-eight colonies were wintered on honey and forty-four on sugar syrup. Of those wintered on honey, thirty received shallow food chambers, and eight received deep ones. The bees were able to fly up until November 8 and after February 24. Towards the end of April when the colonies were examined it was found that those wintered on honey were in worse shape than those of the sugar syrup fed group. Eight of the colonies died, of which six received honey and two received syrup. By the tenth of May it was found that in all the live colonies the number of frames covered by the bees averaged 6.5 per colony.

Britishers Who Stick

Ninety-Five Per Cent of Harvesters From Britain Have Made Good

Notwithstanding the concentrated efforts of a well-organized even though blintant coterie of Communists, ten thousand British miners came to the prairies, and an unexpectedly high percentage of them are remaining to meet the challenge that is Canada's. That challenge of this great Dominion is one that offers to the winner the best there is in life, exemplified by the fact that an immigrant of two decades ago is a senior member of the federal cabinet.

Less than five per cent of the ten thousand miners have gone back, among these are some physically un- fit, others mentally disqualified. Some came with the purpose of making the trip a vacation junket, many others came with Communist instruction to foment trouble — and yet 95 per cent remain.

It's an outstanding defeat for the powers of communism who sought to bring discredit upon both the British workers and upon the Canada that harbors all too many of their type with much too tolerant kindness.—Canadian Finance.

A Billion Bushel Crop

Prediction Is Made That Canada Will Produce This Much Wheat Annually in Short Time

The 550,000,000 bushel wheat crop, which Canada is harvesting this year leads the "Grain World," of Chicago, in a recent issue to predict that within a comparatively short time the wheat production of Canada will total 1,000,000,000 bushels annually.

If this happens, and the estimate is based on a consideration of the trend of wheat production during the last decade, it will entail a tremendous expansion in railway building, elevator construction, sales of agricultural machinery, and general manufacturing. The total wheat production of the world this year is estimated to be 2,606,306,000 bushels or 50,000,000 bushels more than last year.

With Russia still importing wheat, the Oriental demand growing, the domestic demand increasing, and with the growth in population, it is logical to assume that the wheat production in Canada will continue to increase.

Not Allowed to Forget

A fellow who does not often go to the races attended a meeting one day and had his wallet stolen. This fact he was unluckily forced to report to his wife. The story of his misfortune got around and one day a business acquaintance said to him:—"Have you heard anything about your wallet?" "Yes," replied the owner viciously, "I have, morning—noon—and night!"

The park-keeper found a tramp asleep on one of the seats. "Hi, you!" he cried, shaking the man's shoulder. "I'm going to close the gates."

"All right," murmured the tramp sleepily. "Don't slam them, will you."

Wash the mouthpiece of the telephone frequently to keep it in sanitary condition.

Had it not been for Sir George Simpson, governor of the Hudson's Bay Company, whose historic visit to the Pacific coast a hundred years ago was celebrated recently the province of British Columbia would be in the possession of the United States, and Canada would have no outlet to the Pacific Ocean.

Perhaps this statement, made by Mr. Charles Vincent Sale, president governor of the Company of Adventurers, did more than anything else to impress on the minds of those gathered at Fort St. James, B.C., for the centenary the importance of the exploits of the man who has been called the Cecil Rhodes of Canada. The romance of a century ago was brought vividly before their eyes in a pageant which resurrected Simpson's journeying across the wide stretches that ultimately became the Dominion, but after all, the living picture of the governor and his retinue arriving at the fort could not even indicate the far-reaching effect Simpson's activities were to have in the history of North America.

"Fort St. James in those days," said Governor Sales, "was the outpost of an empire; the visible sign of British occupation; a centre of government." He went on to tell of the claims of Spain to all the coast south of the Russian possessions, of Spain's waiving her claims in favor of the United States.

"Our American neighbors," he said, "were disposed to believe that the title was clear to all the south of the Russian possessions. And so it might have been but for the fur trade and for such men as Alexander MacKenzie, Simon Fraser, John Stuart and Sir George Simpson."

"It was in the struggle between the Northwest Company and the American interest for the country west of the Rocky Mountains that Simon Fraser founded Fort St. James in 1806. The Astorians came and vanished and in 1821 the United States proclaimed her right to the Pacific Coast and Sir George Simpson became the Hudson's Bay Company governor. Three years later, Simpson, to put the affairs of the Columbia district in shape and save the coast from the United States and Russia, crossed the country from York Factory, making the journey in 84 days, 20 days less than any previous record, and established the company's headquarters in such a way as to mark the limits of what he thought should be British territory on the north and south."

Oriental Use Old Papers

Manufacturers of Fireworks and Novelties Find Them Indispensable

Old newspapers may be a problem to you, but in China and Japan they are practically indispensable.

Reports to the U.S. Shipping Board show that old newspapers constitute a large share of the ship's cargoes destined for Oriental ports. One day recently newspapers shipped from Los Angeles alone weighed 5,000,000 pounds.

Oriental firecracker and novelty manufacturers use the papers in their products. Total shipments for 1927 to the Orient amounted to 70,018,000 pounds, valued at \$685,425.

A.—Have you seen the conjuror over in the side show?

B.—Now! I suppose it's the usual humbug.

A.—No, sir! This man is a wizard and a real artist. I handed him a counterfeit bill to work with, and he gave me back a real one.

The Chemin de Fer du Nord has always held first place among French railroads for speed.

"If a man wants me for a wife he must be an athlete and be able to run as fast as Nurm!"

"If a woman wants me for a husband she will have to be able to run faster than Nurm!"—Lustige Blaetter, Berlin.

Royal Yeast Cakes

STANDARD OF QUALITY FOR OVER 50 YEARS

MAKE BETTER HOME MADE BREAD

WORLD HAPPENINGS BRIEFLY TOLD

One of the finest old churches in Moscow, the "Strasney Monastery," is being converted into an Anti-Religious museum.

Leon Vanderstuyft, Belgian bicycle rider, broke the world motorpacer record for sustained speed when he rode 76 1/2 miles in one hour.

A report is current in Bucharest that Poland, Roumania and Greece have concluded a military agreement to make a common front against Russia in the event of war.

Thousands of cattle have been drowned in the flood that came after the bursting of the Yser dykes in Belgium and farmers estimate their damage at about \$25,000,000.

The Canadian Press was reliably informed that there is no reason to believe that the Duke and Duchess of York contemplate an early visit to Canada, as rumored in Ottawa.

T. Nichols, of the Royal Canadian Mounted Police, Lethbridge, Alta., will receive the Imperial Service medal awarded by His Majesty the King, according to the Canadian Gazette.

Great Britain and the U. S. have continued for another year their agreement on administrative co-operation for the prevention of smuggling liquor into the United States by ships flying the British flag.

It was reported in League of Nations circles that the Irish Free State, following the example of Canada, is planning to establish a legation in Paris and appoint a minister to France.

The appointment of Jean Knight as French minister to Canada has been announced officially, confirming previous intimations that M. Knight would be sent to Ottawa as France's first diplomatic representative in the Dominion.

Fine Shipment of Herefords

Range Cattle From Alberta Bring Large Sum in Chicago

Ninety-three head of dry cows from the McIntyre ranch in Alberta were recently consigned to Chicago in exchange for a \$10,000 cheque. Cattlemen looking over the shipment claim that it is one of the finest lots of range cattle ever forwarded from Calgary. The heaviest animal in the lot tipped the scales at 1,700 pounds and the ninety-three averaged 1,350 lbs. These cattle come from one of the few remaining old-time ranches which is running a herd of upward of 5,000 Herefords.

Men's belts are used mostly for sports wear in Great Britain.

Ships that cannot afford wireless cannot afford crews.

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because it is harmless, tasteless, does not neutralize many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours. Be sure to get the Genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Protect Submarine Crews

Italian His Invention That May Prove of Great Value

Cesare Borghetti, inventor of an apparatus for saving the lives of submarine crews in case of danger, has succeeded in interesting the Italian government in his invention and now gives the press some details of his amazing invention.

Signor Borghetti's apparatus consists of several hollow cylinders attached to the sides of the submarine in such a way that they do not impede its passage through the water. The number of these cylinders depends on the number of men in the crew.

The outer chambers are reached by two doors from the interior of the vessel. Inside of each of these cylinders is another airtight chamber with four compartments holding compressed air.

When the shipwrecked crew is inside the inner chamber and the doors are tightened, a lever releases it from the outer cylinder which is firmly attached to the sides of the submarine. The cylinder containing the men is constructed in such a manner that it will float, automatically, to the surface even from a depth of 600 feet.

Any Woman Can Look Stylish

By MAE MARTIN

Most stylish looking women know simple ways to make last season's things conform to this season's styles. Thousands have learned how easily they can transform a dress or a blouse, or coat, by the quick magic of home tinting or dyeing. With true, fadeless Diamond Dyes, anyone can do this successfully. The "know-how" is in the dyes. Diamond Dyes don't streak or spot like inferior dyes. New, fashionable tints appear like magic over the out-of-style or faded colors. Tinting with Diamond Dyes is easy as bluing, and dyeing takes just a little more time. Only Diamond Dyes produce perfect results. They have been perfected by over 50 years experience. Insist on them and save disappointment.

"Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Write Mae Martin, Diamond Dyes, Windsor, Ontario.

Opening of Bay Route

Suggestion Is Made to Hold Monster Excursions From All Parts of Canada

By way of establishing an "entente cordiale," W. Moss Thrasher, secretary of the United Farmers of Canada, Saskatchewan section, suggests that the opening of the Hudson Bay trade route to Great Britain be celebrated by a huge excursion from all parts of Canada, the mid-western states and Great Britain, the meeting place to be on the shores of the bay.

Mr. Thrasher also suggests that at the same time the Federal government should take steps to eliminate all trade restrictions with the Mother Country and bend every effort toward centralizing the huge purchasing power of western Canada in Great Britain, where, he points out, the western farmers sell the bulk of their products.

He believes that this would be the first logical step towards solution of western Canada's immigration as well as industrial problem, and that something should be done when the west is more closely linked with the Old Country by the opening of the Hudson Bay route.

"Western Canada sells its surplus products in Great Britain," he says. "and accordingly should buy manufactured products required from that source. No country can carry on successfully by selling to one market and buying from another. Someone will have to suffer. The lack of balance will eventually be felt."

NEW HOTEL AT LETHBRIDGE

The Marquis Hotel, Lethbridge, Alta., which has been recently opened to the public, under the management of Mr. A. W. Edwards. The Marquis is fully modern in all its appointments, is a decided asset to the city of Lethbridge, and is proving quite popular with the travelling public. The Marquis Hotel was named after the new variety of wheat of that name, and was built as a community enterprise at a cost of \$275,000.

Cattle Feeding Awards

C. B. Latta, Govan, Wins Prize in Connection With Saskatchewan Competition

C. B. Latta, Govan, Sask., won the first prize of \$100 in the carload lot contest staged in connection with the Saskatchewan farmers' cattle feeding competitions, according to the report of the judges' awards received by Hon. C. M. Hamilton.

Mr. Latta also wins second prize, \$45, in the competition for groups of ten to fifteen animals, and second prize of \$20 in the group of five animals, making a total of \$165 in prize money. In addition he sold his steers at good prices. Mr. Latta made a gross profit of \$49.63 per head on his carload lot; \$43.17 per head on his group of ten, and a gross profit of \$56.70 per head in his group of five.

C. J. Peters, of Brownlee, won second prize, amounting to \$75 for the records made by his carload lot. Mr. Peters made good profits. A total of 26 steers were sold at a gross profit per head of \$58.36. A net profit of over \$20 per head. Among other prize winners, B. A. Wright, Drinkwater, won fourth prize in the carload lot, and also fourth for group of five.

A. W. EDWARDS, Manager, Marquis Hotel, Lethbridge, Alta.

Many Planes in Pageant

Thousands of People Attended Air Mail Service Inauguration

The first aerial mail service between Canada and the United States was inaugurated October 1 at St. Hubert aerodrome, near Montreal, where a great aerial pageant, in which fifty planes took part, commenced at 9 o'clock in the presence of thousands of spectators. Planes of every size, even every color, Moths, Reid Rammers, Swallows, Cabin-type, Vickers-Fairchild, Stinson-Detrolter, Avro Avian, as flown by Hinkler from England to Australia, Leoning Amphibian, Pictair Mailwing, tri-motor Ford, and the most interesting of all, three Siskin fighters, participated in the evolutions. The Siskins were sent by the Royal Canadian Air Force, and are reputed to be the most deadly warring machines in existence.

"They were seated across the table from each other in the restaurant, the wealthy octogenarian and the gold digger.

"Will you marry me if I have my health rejuvenated?" he asked.

"I'll marry you, all right," she replied, "but you leave your health the way it is."

She—"I've been trying to think of a word for two weeks."

He—"How about fortnight."

Poverty is no disgrace. At least it is better than being a multi-millionaire with chronic indigestion.

The herd of 709 buffalo bought in 1907 by the Dominion of Canada in Tablov, Mont., now numbers 16,000.

'DIARRHŒA Was So Bad Child Passed Blood

Mrs. Harry Nesbitt, R. R. No. 2, Shannon, N.B., writes:—"Last Fall my little boy took very bad with diarrhoea and before I knew it he was passing blood. I went to our medicine case and gave him a dose of

and a little later gave him another, and half an hour after the second dose he got relief and by the time he had taken six doses he was like a different child."

This wonderful bowel complaint remedy has been on the market for over 80 years; put up only by The T. Milburn Co., Limited, Toronto, Ont.

Our Boys' Pajamas

It is essential that boys have comfort while asleep as during the play hours. Mother will be happy to find this simple pajama pattern is large and roomy for the little fellow, yet tailored enough to suit the grown-up boy. Any soft washable material is suitable for this night-garment. The collar is high about the neck or rolled low for the warm weather, and buttons and buttonholes or braid loops finish the front closing. No. 1106 is cut in sizes 4 to 16 years. Size 10 requires 3 1/2 yards 32-inch or 3 3/4 yards 36-inch material. Price 25 cents the pattern.

SPIRITUAL GIFTS

Golden Text: "Now abideth faith, hope, love, these three; and the greatest of these is love."—I Corinthians 13:13.

Lesson, 1 Corinthians 12-14.
Devotional Reading: 1 John 4:7-16.

Explanations and Comments

Spiritual Gifts are Diverse, But the Spirit is the Same, 12:4-7.—There was rivalry among the Corinthians as to which of them possessed the greatest gift for God's service. "The tendency at Corinth was to estimate spiritual gifts by their showy rather than their solid character." The reverse was Paul's way.

"The things we consider most remarkable many, after all, be least important. An ecstasy is pleasant, but strength to endure with fidelity is more significant. The touchstone and test of our Christianity is our avowal of Jesus Christ. If in our souls we own him Lord we are possessed of the Spirit of Life." (John Gardner.)

There are different gifts, Paul wrote the Corinthians, but the same Spirit reveals himself in them all; there are different ways of ministration, but back of them all is the same Lord; there are different sorts of activities, but they are all wrought by the same God. To each one is given his manifestation of the Spirit for the good of others.

Then in verses seven to eleven Paul mentions various spiritual gifts and repeats that, different as they are, they are alike in source, the Spirit apportioning them as he wills. Paul does not disparage spiritual gifts, he realizes their value, but he realizes also the need of unity and co-operation in the church, and this he enforces in verses 12-30, by his figure of the body and its members; as all of the members are different but essential to the body, so it is with the church and its members.

Descriptive Atlas of Canada

100,000 Copies Distributed to School Children in Old Country

School children in the British Isles will this year receive over 100,000 copies of a descriptive atlas of Canada, provided by the Department of Immigration. This is part of an intensive publicity to induce migration to Canada.

The atlas is distributed free to students in the Old Country, through the central office of the department in London. Agents of the department travel through the country in demonstration vans, carrying exhibits descriptive of Canadian industries, and they lecture at the various schools. Copies of the atlas are left with the schoolmasters. Large wall maps are also provided.

The book comprises eighty pages and is stated to compare favorably with the geographies used in Canadian schools. Besides a large number of colored maps, it contains literature dealing with the physical characteristics, climate and industries of the various provinces. Special emphasis is placed on the opportunities open to those who wish to settle on Canadian farms. The maps have been prepared by the Natural Resources Intelligence Branch of the Department of the Interior, and are stated to be of the most modern type.

The atlas is eagerly received by teachers, officials indicate, and is claimed to have very much to do with the increasing desire by young people to look towards Canada as their future home.

Large numbers of the book are also in demand in the United States and thousands of requests for copies have been received from American schools. In congratulating Canadian officials on the excellence of the book, teachers over the border admit that geographies used in their schools give a very restricted and often inaccurate conception of this country. The atlas is particularly in demand in the farming areas in the central States.

Wife (to returning husband at seaside resort): Oh, darling, I'm so glad you've come. We heard that some idiot had fallen over the cliff, and I felt sure it was you."

We have often wondered, in our innocent way, whether the inventor of the telephone booth also designed the breakfast nook.

China's new warship is called "Peace." Hereafter it will be conceded that the Chinese understand a joke.

Makes First Entry

Saskatchewan Farmer Makes Entry in Grain and Hay Show at Chicago

The distinction of making the first entry in the International Grain and Hay Show to be held at Chicago next December goes to Canada. James A. Paur, a farmer at Langham, Saskatchewan, has entered samples of Marquis wheat and of rye. Canada always carries off a fair share of the awards at the International Show. In the last 17 years the Dominion has won the world's wheat championship 14 times.

In shipping their choicest teas over land and sea, great tea planters never take any chances of the tea deteriorating in transit. They pack it in aluminum or lead—Red Rose Tea is always packed in aluminum, so it will come to you as fresh and flavorful as the day it was blended. g.w

World's Largest Building

Chicago Furniture Mart Heads List With 25,370,000 Cubic Feet

The following buildings are reckoned by their cubic measurements to be the largest buildings in the world: Chicago Furniture Mart, 25,370,000 cubic feet; Equitable building, New York, 24,000,000 cubic feet; General Motors building, Detroit, 20,411,000 cubic feet; Union Trust building, Cleveland, 20,000,000 cubic feet; Railway Exchange, St. Louis, and Illinois Merchants' Bank, Chicago, each 17,850,000 cubic feet; and the Continental and Commercial Bank, Chicago, 13,200,000 cubic feet.

If they came from a monkey there's nothing you can do about it. But if you are going to the dogs you can detour.

Headaches

For a headache, however painful, inhale a little Minard's and bathe forehead. Speedy relief.

W. N. U. 1754

British Harvesters On Return To England Speak Well Of Canada

London.—British harvesters who returned to Great Britain recently landing at Liverpool from the liner Andania, strikingly refuted complaints concerning conditions in Canada brought back by other harvesters. There were many harvesters from the Andania who had been quite successful in the Dominion.

The majority of the men returning recently said they had found steady employment in Canada at wages of from three to four dollars a day. Some of them were able to pay their passages home at the special rate of \$60.

One harvester from Wigan, after paying his passage home had \$65 in his possession.

A striking example of the kindness shown many of the harvesters by Canadian farmers was given by a young Britisher named Hoare. Hoare said he was taken ill while working in the fields and the farmer and his wife not only took care of him during his illness but paid him for three days at the rate of \$3 a day.

The harvesters who returned recently were very bitter over the actions in Canada of what they termed the "Communist section." This section, they stated, wrecked the scheme as soon as the harvesters landed in Canada. Their influence had been so bad that in many instances Canadian farmers, before employing men, asked whether they were Communists.

Arrest Train Bandit

Robber Of Ontario Mail Car Offered No Resistance

Windsor.—Three hours after a mail car had been rifled of Canadian currency estimated at about \$40,000, John Gibbs, 20, said to come from Los Angeles, Cal., was arrested by the local police on the Detroit River train ferry and landed in the goal here. According to authorities here he has admitted his guilt. When taken into custody he was carrying two pistols but offered no resistance to the officers.

The robbery was a most daring one the lone bandit holding the mail clerks helpless at the point of a revolver while he calmly looted the car.

First Freight Has Reached Flin Flon

Five Tractors Have Been Delivered At Mile 83

Flin Flon, Man.—Following the driving of the last spike on the Flin Flon Railway, freight has started to arrive by train and the first load, consisting of five tractors with tracks on attachments, delivered a mile 83.

There are now 15 tractors hauling freight in and out of the big mine. The arrival of a further shipment of tractors is expected in the near future and by freeze-up roads to Island Falls should be in shape to stand the heavy traffic which will cross them during the coming winter.

Eliminate Level Crossings

Toronto.—With the object of eliminating every level crossing in Ontario the provincial department of highways is having an official report made on every point where railway lines cross one of their highways.

Hon. W. D. Euler Issues Denial of Charge Against His Department

Ottawa.—Hon. W. D. Euler, minister of national revenue, has issued a lengthy statement dealing in detail with a certain charge reported to have been made by R. H. Pooley, attorney-general of British Columbia against the department which Mr. Euler administers.

Mr. Euler declares that his department is attempting in all sincerity to co-operate with the provinces in the enforcement of their liquor laws and that not in a single instance have licenses for breweries or distilleries been granted when provinces were opposed. The minister deals specifically with the shipment of a carload of whisky from the distillery of Gooderham and Worts to which, ac-

Turned Adrift In Leaky Boat

Quebec Liquor Commission Inspector Threatened With Death By Captors

Montreal.—Joseph A. Patry, Quebec liquor commission inspector, was kidnapped by bootleggers at Riviere Du Loup. He managed to reach shore by paddling his craft with an old piece of wood.

Patry was instructed to probe suspected illegal transportation of liquor by boat to New Brunswick, and with two companions set out for a large gasoline yacht which was anchored a short distance from the Riviere Du Loup wharf. The inspector managed to scramble aboard, but before his assistants could mount the boat, the yacht's engines were started and the yacht set out for the middle of the river. Patry tried to draw his revolver, but his arms were seized from behind and he was warned if he raised an outcry he would be killed, and his body thrown overboard.

Later on the officer was lowered into a leaky rowboat and left to his fate. The matter has been reported to the authorities.

Fire Takes Four Lives

When Farm House Near Brandon Was Completely Destroyed

Brandon, Man.—Four persons were burned to death when the farm home of Alex Wilson, near Moore Park, Man., was destroyed by fire.

The dead: Mr. and Mrs. Alex Wilson, Mervin Wilson, their son, and Miss Sarah Wilson, Mr. Wilson's sister.

The fire was discovered by I. M. Harrison, a neighbor, when he was awakened by the reflection of the flames upon his windows. He put on his clothing and rushed out to discover that the Wilson house was on fire. The blaze was too far advanced at the time to permit rescue work.

W. E. Mann, general storekeeper at Moore Park, father of Mrs. Wilson, was also quickly on the scene, but the heat was so intense that he could not get near the building.

All of the bodies were recovered. The cause of the fire is a mystery. The barn, garage and other buildings on the farm were unharmed.

Odd Accident To Airplane

Making Forced Landing Was Carried Out Over Lake

Ottawa.—An unusual forced landing at Black Lake, Que., in which the pilot and four passengers escaped uninjured, has been reported to the air board by the Canadian Transcontinental Airways.

Engine trouble forced down a plane piloted by I. Vachon. An effort was made to land on the ground but the momentum carried the machine out on the water. A serious accident was only avoided because it was of amphibian type it was stated. The left wings of the air craft were slightly damaged.

Nurses For Labrador

Montreal.—Two nurses, Misses Canby and Cole, have left Quebec for Labrador, despatched there by the Federal Minister of Health. They will act at outlying stations of Harrington and Mutton Bay.

General Allenby In New York

British Hero Honored By Official Salute Of 17 Guns

New York.—Field Marshal Sir Edmund H. H. Allenby, so-called last crusader, who conquered the Turks in Palestine and Egypt for the British, was welcomed on his arrival here for the American Legion Convention to be held soon in San Antonio.

Arriving on the liner Majestic with Lady Allenby, General Allenby received an official salute of 17 guns from the army reservation on Governor Island as the city's reception boat Macom carried him from the liner to the battery at the Southern tip of Manhattan Island.

"The British hero spoke of the growing tendency toward 'open diplomacy' among nations but saw no sign for great disarmament at present."

"I do not believe there is anyone in the world who does not want peace if they can get it," he said. "However, one has to be ready for war, as you do not keep burglars away by leaving the door unlocked."

Exhibit For Royal Winter Fair

Saskatchewan Will Send Fifty Of Its Best Horses

Regina.—Fifty horses, the pick of the Clydesdales, Percherons and Belgians in the province, will represent Saskatchewan at the Royal Fair, Toronto, in November. It was decided at a meeting of the livestock board held recently.

While many selections have yet to be made, both in horses and other classes, the board has definitely decided that the following will exhibit: Clydesdales:—The Experimental Farm at Indian Head, the University of Saskatchewan, John Falconer, Govan, and Mrs. W. H. Bryce, Donne Lodge, Arcola.

Percherons:—C. M. Rear, Regina; Robert Weir, Weldon; George Doan and Sons, Stoney Beach.

Belgians:—C. M. Rear, Regina; Robert Thomas, Grandora, Andrew Nohin, Rouleau.

In the horse exhibits from this province there will be 20 Clydesdales, 15 Belgians and 15 Percherons. Many other exhibitors are yet to be named.

Will See Air Liner Arrive

Canadian Engineer Going To Lakehurst To Represent Dominion Air Board

Ottawa.—Wing Commander E. W. Stedman, chief Canadian aeronautical engineer, will view the arrival of the German air liner Graf Zeppelin at Lakehurst, N.J., as representative of the Dominion air board it is learned.

Mr. Stedman examined the big ship this summer when in Germany and discussed the flight with Commodore Eckner and other officers who will be in charge of the aircraft.

Special attention will be given to the methods used for mooring the immense craft at Lakehurst. A mooring mast 250 feet in height is being constructed by the Canadian Government at the flying field at St. Huberts, Que., and some improvements may result from Mr. Stedman's observations.

Premier King Returning

Ottawa.—Premier Mackenzie King will sail for Canada on or about the 19th of this month, according to word received here. He will probably be accompanied on his return journey by Hon. C. A. Dunning, minister of railways; and Hon. Raoul Dandurand, government leader in the senate.

Finds Lost Scout

Windsor, N.S.—Col. Collins, South African delegate to the Empire Parliamentary Association, discovered W. Muncey, missing Canadian scout of the Boer War, whom Collins has been seeking all over Canada, resides at 1236 27th Avenue, Vancouver.

POLICY IS CRITICIZED

Lord Cushenden, whose foreign policy on behalf of Great Britain is denounced by David Lloyd George as "one of barely veiled subserviences to France."

Believes River Under Control Of Dominion

Hon. N. W. Rowell Says Federal Rights Not Limited To Tidal Waters

Ottawa.—The Dominion parliament has authority to declare the existence of a public right of navigation over any river navigable in fact. Before the Supreme Court of Canada, Hon. N. W. Rowell, K.C., counsel for the Dominion, made this further contention on the question of federal and provincial control respecting navigation and water ways.

"If a public right of navigation does not exist, as Ontario suggests, on the Great Lakes and the western portion of the St. Lawrence, Mr. Rowell proceeded, 'then under the British North America Act and the powers of the Dominion in regard to navigation and shipping, the Dominion must have power to take action in the interests of having a national highway for trade and commerce in Canada. My contention is that the Dominion has absolute control over navigation and shipping.'"

Killed By High Power Wire

Sudbury Couple Received Felt Charge Of 4,000 Volts

Sudbury, Ont.—A man and his wife met death by electrocution in front of their home while neighbors looked helplessly on. Frank Gervais, Pearl street, and his wife, were the victims.

The man had been attempting to remove a piece of discarded radio aerial wire from a power line carrying 4,000 volts. He was using a mop and a broom handle for his dangerous task when the end of the wire flew up, the end touching his wrist and his wife immediately caught hold of him and she too received the full force of the terrific charge of electricity.

They died clasped in each other's arms.

Royalty In Talking Film

Bismoral, Scotland.—The King has just seen himself for the first time in the talking films and apparently enjoyed the experience considerably. His Majesty, together with the Prince of Wales, was photographed recently while reviewing the troops on the Horse Guards' Parade at Whitehall.

Honored Canadian Minister

Paris.—Premier Mackenzie King, of Canada, gave a dinner, Oct. 2, in honor of Hon. Philippe Roy, first Canadian minister to France. The dinner was also tendered as a graceful compliment to Madame Roy, whose birthday it was.

A VERY GRIM TALE

Once upon a time there were three bears. Along came the Trans-Canada and then there were two. The moral to this little story is—do not trespass on the railway tracks. Mother Bear is seen giving her sons an airing at Lake Louise. (C.P.R. photo.)

British Government Makes Proposals For Huge Settlement Plan

Fire Destroys Castle Of Viscount Lascelles

Property In Irish Free State Mass Of Ruins

Portumna, County Galway, Irish Free State.—Portumna Castle where elaborate arrangements were made for the approaching visit of the owner, Viscount Lascelles and his wife, Princess Mary, was burned to the ground.

Civic guards and soldiers made a futile effort to bring the blaze under control. The main portions of the Portumna Castle were burned in 1927, and the recent fire attacked the remaining parts of the castle and the outbuildings.

During the night 25 tons of hay on another estate where Viscount Lascelles had planned to visit also were burned. It is stated the visit of the couple to Portumna may be postponed.

Would Make Travelling In Empire Easier

Plan To Abolish Passports From One Part To Another

Toronto, Ont.—A campaign for the abolition of the requirements of the British Government that British-born travellers going from one part of the British Empire to another should possess passports, will be conducted by the Canadian Steamship and Tourist Agents' Association, the association decided recently.

Members of the Association are confident that, in this move, they have the sympathy of the travelling public, who have to abide by "this unnecessary trouble." They will endeavor to bring to bear upon the British Government—through the Department of External Affairs—sufficiently strong evidence to have this class of passport eliminated.

Harvesters Have Good Year

Men Returning East With More Money Than Usual

Winnipeg, Man.—Harvesters returning to eastern Canada are taking home with them more money than is usually the case. This is due to the exceptionally fine weather which has favored the operations and to the prolonged season of harvesting because of the unusually heavy crop.

The men returning by tens and dozens, some to eastern Canada and some to Great Britain, are well satisfied with the money they have made. Canadian National officials said recently that several had expressed their intention of returning to become permanent citizens of the West.

No Demonstrations Allowed

Jerusalem.—The district commissioner of Jerusalem has refused to permit the orthodox Agudath Israel to hold a festival procession on the occasion of Succoth and has also banned a Moslem religious demonstration. It was stated that the government would prohibit any religious manifestation in Palestine.

Ottawa.—As the outcome of the Canadian tour of Lord Lovat, chairman of the British Overseas Settlement Board, the British Government has made a proposal to the Canadian Government under which 20,000 British families would be settled upon Canadian farms in the next 10 years. The actual details of this, the greatest of all settlement schemes ever to be placed before the Canadian Government, were worked out by Lord Lovat and forwarded by him to Hon. Robert Forke, minister of immigration.

The details would not be divulged at the immigration department here, as it has been agreed to keep everything secret. However, in rough outline it is understood that the Lovat scheme provides that 20,000 settlers, mostly heads of families, are to be settled upon Canadian farms within ten years. These men need not necessarily be drawn from the agricultural class, but will all have had a special training, in training schools in Britain.

From four to five thousand cottages are to be erected in Canada and the new settlers, upon their arrival will be placed in these cottages. They will live there for a sufficient time, from three to four years, to accumulate savings of \$500 and farm experience, when they will be given a farm. Each settler will be assisted to the extent of \$2,500, to be used either for payment on property or in purchase of equipment. The cottages will cost approximately \$4,000, and this money must be found by the governments.

The settler will pay for his farm in 30 years and the interest rate on the mortgage will be six per cent.

In regard to the financing of this huge enterprise, the scheme is quite unusual.

The Canadian department of immigration, through the land settlement branch or a subsidiary corporation, will issue land bonds, bearing interest at 4½ or 5 per cent. The bonds will be secured upon the land which is purchased for purposes of resale to the settlers. The bonds will be guaranteed by the British government as to principal and interest.

It is said that the British government desires, however, to limit its liability to ten per cent. but this is not the proposal here.

To Open Office In Peru

Ottawa.—G. R. Stevens, Canadian Trade Commissioner in South Africa, has arrived in Canada en route to Peru, where he will open a new office with jurisdiction over Peru, Bolivia and Ecuador. Prior to his departure for South America, Mr. Stevens will visit manufacturing centres of Canada in connection with Canadian exports to his former territory.

Aged Indian Chief Dead

Vallejo.—An Indian chief whose age was given in tribal records as 130 years was mourned here by four sons, each of whom is over 90 years old. The aged leader was Manuel Portes, chief of the Santa Rosa Indians.

Empire Party Was Well Pleased With Reception In Canada

Sydney, N.S.—Delegates of the Empire Parliamentary Association have bade their farewells to Canada. "We have been treated like princes. We have been received like old friends," exclaimed Viscount Peel, chairman of the delegation, addressing a final dinner given by the Canadian club and city of Sydney. And to his words of farewell and gratitude were added those of representatives from every parliament in the Empire.

In their journeyings through Canada, Lord Peel felt, members of the British delegation had been able to remove misconceptions. It had been thought in some quarters apparently that the Empire marketing board was an instrument for pushing British goods in Empire markets. In reality it was designed to push Empire goods in the British market and the cost fell on the British taxpayer. It had been thought, in some quarters, that the unemployment insur-

ance, mis-called the dole, was demoralizing charity. In reality the employee paid his share to a fund and was entitled as of right to his insurance payment when the curse of unemployment fell upon him.

"We have heard it suggested," Lord Peel added, "that we desire to load Canada with inefficient unemployed."

"I repudiate with all my force this infamous suggestion, but there are, I am convinced, great opportunities in Canada, with good organization, for substantial numbers of able and willing workers from our country who will form a fine type of Canadian citizen. We further discussed the opportunities for the extended investment of capital from Great Britain and the other Dominions and our speakers have laid stress on the necessity for accurate information so that there will be no disappointment to the investor."

Compulsory Marking Of Eggs

Buyers in England Would Know Product Was Canadian

In consideration of the fact that there is apparently a growing demand in the British Isles for Canadian importations of agricultural products—especially butter and eggs, the Minister of Agriculture and Fisheries of the United Kingdom has now recommended through the committee appointed to deal with such work that an order in council should be made prohibiting the sale of eggs in foreign countries for export to England unless they are marked.

The regulations as to marking are that every egg shall be marked durably in ink in letters at least one-sixteenth of an inch high. Every egg shall bear this mark—the name of the country from which the eggs are to be shipped. This information was received from a bulletin issued by the Saskatchewan Department of Agriculture.

Further this report states, the motive for such an action is to assure the buyers of the Old Land that they are getting products which have been produced in the United Kingdom. There is undoubtedly a growing demand for this trade, and in view of the fact that the Dominion government have recently taken steps to make such restrictions as will invariably raise the standard of the Canadian product, there is every likelihood of there being a huge increase in the trade in agricultural products in the near future.

This increased interest on the part of the consumers should be appreciated by Canadians, this report intimates, in view of the fact that up to date the exports of such commodities have been rather low as compared with other countries in the Empire or without.

"This action was taken by the Empire Marketing Board to encourage the egg consumers of the Mother Country to buy Canadian products, and that this idea of marking them with indestructible ink so that the name of the country would not be destroyed even after the egg was boiled, would assist them in their natural desire to patronize Empire products," quoting this report further.

Figures showing Canada's exportations to the United Kingdom for July this year show the following results: Dressed poultry was exported to the value of \$2,050; butter to the amount of 4,485 cwt.; and eggs to the value of \$17,167, as compared with a total importation value of eggs to the United Kingdom of \$5,825,670.

Fish From Northern Lakes

Thousands of Pounds Shipped From Alberta to Eastern Cities

The map of Canada is being rolled back so far as the economic handling of fish from the northern lakes is concerned, according to the progress made in the shipment of Lake Athabasca trout and whitefish to such markets as Chicago, New York and Toronto, says the Financial News. The fishing being carried on by two companies at Lake Athabasca, in Alberta, constitutes the most northerly commercial operation in Canada, the extent of which is indicated by R. T. Reid, Federal Inspector of Fisheries, who on his recent return from an inspection trip stated that 62,000 pounds of trout and 4,000 pounds of whitefish were taken from the lake in the first three days of the summer fishing season.

First Grain Shipment to Spain

The first shipment of wheat from Montreal to Spain left the other day—201,132 bushels. Wheat shipments to foreign countries last year amounted to 118,227,726 bushels from Montreal, but not a single bushel was exported to Spain among the seventeen countries to which grain was consigned. This is said to be the first shipment of grain ever made to Spain.

"Atrocious! A mouse in the soup!" Landlady: "The cook's careless, dear. But why should you worry? You are not a vegetarian!"—Euen Humor, Madrid.

Canada Has Extinct Volcano

Geologists Working in B. C. Say Eruption Occurred 300 Years Ago

Less than 300 years ago Canada possessed an active volcano, in the opinion of explorers who have been studying the mountains north of Alice Arm, in the northeastern section of British Columbia.

The volcano, according to authorities, is now definitely dead and there is now no danger of further eruption. There were apparently two pronounced eruptions which have left their trace and they were separated by a period long enough to allow the lava to cool. The first explosion blew out a crater about 400 yards in diameter. After a period of quiescence sufficiently long to form a hard and level floor in the crater there was a second eruption which formed a cone or scoria of cinders, within the original crater, 300 feet long with a crater 250 feet deep. It was from the base of this cone that the lava flow proceeded.

From the volcano the lava flowed down a creek valley in a stream 300 yards wide until it entered the valley of the Tseax River. Crossing this river to the west side, it completely dammed the stream, forming or enlarging a lake nearby. The lava then turned north and continued down the valley of the Tseax in a stream 2,000 feet wide, as far as the Naas River. By the time it reached the Naas the lava had lost much of its fluidity and, the great river was not dammed, although the lava spread out down the left bank for six miles.

Indians living near the extinct volcano say that the last eruption was about 150 years ago, but geologists discovered trees 170 years old growing on the edge of the lava. They place the time of the eruption at about 300 years ago.

Cost of Raising Dairy Heifers

Record Is Kept at Experimental Station in New Brunswick

An accurate record of the cost of raising dairy heifers was kept at the Fredericton, New Brunswick, Experimental station. One lot of three heifers including one Ayrshire and two Holsteins, were kept and fed together from birth until they were one year old. They were fed on whole milk until from four to six weeks old and then gradually changed to skim milk. When the calves were three months old they received in addition to the skim milk, one part of flax seed and four parts oat meal cooked and made into a gruel. Each calf was fed from one-quarter to one pound of this gruel per day, the amount fed depending upon the ages and condition of the calves. They also received hay, roots and some dry grain. The composition of the dry grain mixture was varied from time to time but was made up chiefly of three parts bran, two parts crushed oats, one part oil cake, and one part brewer's grains. The aim in feeding was to keep the calves growing and to avoid a setback. The superintendent of the station, in his 1927 report, published by the Department of Agriculture at Ottawa, shows the detail of the feeding and the cost of the feed, which amounted to \$65 for the three calves during the year.

Canadian Cattle for Australia

Shipment of Purchased Stock to Be Sent from Brandon, Man.

The Australian government has just completed a deal for eighteen foundation heifers and two bulls from J. D. McGregor and Sons, the well-known Aberdeen Angus breeders of Brandon. The animals will be selected from Mr. McGregor's Glencarnock herd by the head herdmaster of the Australian government and shipped by the Canadian Pacific Railway by way of Vancouver. This shipment, apart from some purebred dairy cattle for the Orient from British Columbia, is said to be the first exportation of purebred cattle from Canada overseas.

Conditions Have Changed

The pioneer who came to Canada 100 years ago, cut all his bridges behind him. He spent his last cent to get here, hundreds of miles of forest and stream divided him from the coast and there was a six weeks' ocean voyage after that. The only way out was to work, to work for thirty, forty, fifty years and some day he might revisit his homeland at his own expense.

What is thought to be the world's biggest tortoise arrived at the London Zoo recently. It weighs about 300 pounds, is three feet six inches long, and is nearly 100 years old.

"Digging is a good hobby for a middle-aged man," says a doctor. But why does he so often call it golf?

STRATFORD-ON-AVON FESTIVAL COMPANY

Members of the Stratford-on-Avon Festival Company photographed on board the White Star liner Laurentic on which they arrived in Montreal recently. The company will make a tour of the principal theatres in Canada and the United States.

Scientist Denounces War

Always Leaves Something To Be Settled, Says Sir Oliver Lodge

Sir Oliver Lodge's recent discourse on war created considerable attention throughout England due to the scientist's strong language.

"War is ugly, disgraceful, dirty, objectionable business," he said in a presidential address to the Federation of Southern Counties Brotherhood.

"We ought to be ashamed of it. Digging ourselves into the mud and pretending to be civilized people. Crawling about under the water and sinking each other's vessels is no occupation for gentlemen."

"Disputes must be taken to somebody that settles them. War does not settle anything, but leaves something to be settled."

Russian Colony in Paris

Refugees Fleeing From Bolsheviks Accepted Work in France

The Russian revolution added to Paris a foreign colony which now contributes more to the flavor of the city than any other alien group. France was the first European country to offer wholesale asylum to the millions of the Russian nobility when they poured across their borders ahead of the Bolshevik terror. France offered these gently born and reared people work, and they accepted it eagerly. Some 300,000 eventually established themselves in France, about one-fifth of these in Paris.

English bank rate remains unchanged.

Made Fortune in Northland

Prospector Taking Trip for First Time in Thirty-Three Years

Heater Morrison, from the silver camp, at Keno, Yukon Territory, is bound for the outside world for the first time in a generation.

Morrison has relatives back in Woodstock, Ont., and many of these he has not seen since the beginning of the present century. Others have been born and grown up since he went away in the spring of 1895 to seek his fortune in the northland.

Morrison was there for the first gold stampede and in 1896 he camped on the site of Dawson, which was to become the hub of the mining universe. Since then he has lived continuously in the Yukon, following placer mining in the Dawson district until 1918, when he went to Keno and staked a quartz claim the following year.

"Yes, I've enough of the world's goods to keep me from worrying," admitted Morrison, who cleaned up a fortune when he sold his holding to the Treadwell Yukon Limited. "But I'm not quitting the Yukon. I'll never feel rich enough for that. Money can't always buy happiness and I'll be happy only in the north."

Six months of civilization, Morrison thinks, will be enough. Then he'll hit the northern train again.

Miss Olive Williams runs an aviation school on Long Island and already has 150 men in her classes. She teaches mechanics, engineering, airplane construction and navigation, as well as mere piloting.

Wireless should be as compulsory as lifeboats on all vessels today.

No Waste in China

People Are Extremely Careful and Make Things Last Indefinitely

As a nation we are rather inclined to be unkindful of waste. The Chinese are just the reverse. They waste nothing, and seem to have the knack of making household ware, for instance, last indefinitely.

As a result of this craze for economy crowds of tinkers, cobblers, and menders of all kinds are able to earn enough money to supply their few needs.

A mender of china ware is called Pou Koti, and through the streets he wanders in his happy-go-lucky way, seeking work. Across his bare shoulders is suspended a box of tools at the end of a long bamboo pole, and as he goes he cries out his calling in shrill accents.

Every now and then a door opens and the owner of the house gives the Pou Koti some dishes or other household crockery to mend. A look of content spreads over his face, for he depends largely on his customers for his morning and evening bowls of rice, which to him mean all the difference between happiness and the reverse.

He sits down then and there, quite oblivious of the fierce sun that beats down upon him while he performs his task.

"Well, Algy, I hear you have taken up walking as the doctor ordered. How does it go?"

"Seems a bit awkward at first without a windshield." — Sheffield News.

In 1927 the output of Canadian dairies was valued at \$133,927,256.

An Ancient Landmark makes way for Progress

History on these western prairies has been lived within the past fifty years. Many a man and woman, in the provinces of Saskatchewan and Alberta, remember the day when the first shingled house was built, when the brick arrived for the first public building.

There was recently brought to the attention of the Canadian Pacific officials an old building at Cassils, Alberta. It was rapidly falling to pieces, and the question arose as to the manner in which it should be destroyed. Queries were made but no memory reached back to the day

when the log section had not flanked the main line of the railway at that point. Finally an old sectionman, reminiscing around the warm stove at Cassils Station, told a yarn concerning the day, the very cold day, on which he went into the section house and lighted his pipe. Suddenly there was a blaze, and the smell of gas led to one corner of the room, under which was found a natural gas hole. The fire was extinguished and the news of the discovery noised abroad. Then the ancients in the vicinity began to highten and it was learned that the logs for the section house

had been brought on flat cars from Castle Mountain near Banff. They had there formed a shack in the construction days of the railway. This was more than thirty-five years ago, and when the building was completed, it was, probably, with the exception of police stations, the first public building between Calgary and Winnipeg. It will now go the way of all vegetables, for its ash will enrich the earth on the spot where the logs so long did their duty in serving their day and generation. The new section house has already been constructed but its life, it is safe to say, will not be so long as its predecessor.

Planning Against Air Attacks

Considering Means to Counteract Effect of Gas Bombs in London

Novel measures to counteract the effect of deadly gas-bombs dropped by aeroplanes on London in possible future wars are being considered, but such expedients as are suggested would cost enormous sums and would provide only a small measure of protection against such a destructive force as could be launched, judging by the recent mock air attack that London experienced.

Emergency supplies of gas masks for every man, woman and child would be one measure of safety. Another would be the installation at every air-inlet of the ordinary house of "seals" of chemical antidotes, which would render each house gas-proof. A third precaution is the training of special gas squads, men wearing gas proof clothing and masks and equipped with a spraying mechanism to lay and neutralize gas clouds in the streets.

And the provision of "community" dugouts is suggested by subsidizing motor companies to build four and five-storey garages underground on the condition that these could be used as bomb-proof shelter in time of war for large numbers of people.

The verdict on the giant mock attack causes many gloomy predictions. It is estimated that in actual warfare at least 500 tons of bombs would have been successfully launched on the capital. Although some raiding formations suffered heavy losses from anti-aircraft fire and the defending fighters, more than half the "enemy" bombers evaded the defence. The time factor is stressed by those who figure that at least 11 attacks were in progress before the enemy planes had been in sight of London for more than an hour.

Devoting Time to Writing

Sir Conan Doyle Giving Up Lectures on Spiritualism

Sir Arthur Conan Doyle, noted English spiritualist and parent mind of Sherlock Holmes, has abandoned his vigorous missionary campaign on behalf of spiritualism.

The steadily increasing strain which the growing demands upon his time for lectures has brought during the past few years has resulted in his partial retirement from the world of Occultism, he says.

Sir Arthur's retirement was foreshadowed in the International Psychical Gazette, and he confirmed the report declaring he desired to devote more time to writing.

"My resumption of writing on a larger scale, however, does not mean the resurrection of Sherlock Holmes," he said.

"I am simply abandoning my lecturing and church work due to the demands upon my time. It must not be taken to indicate that I have lost interest in spiritualism."

Sir Arthur will sail October 25 for South Africa, the only English-speaking section of the world where he has not yet lectured, and will give a series of talks there—"to complete my life's work," he said.

First Shoes Were "Straights"

The "made in Canada" shoe first appeared in 1807. For several years Canadian-made shoes were in the form of "straights" and it was not until 1858 lefts and rights were introduced into Canada's shoe industry. As late as 1900 "straights" were still manufactured in Canada.

Customer (in dog shop): But are you sure he's highly bred?

Dealer: 'Ighly bred! Why, mum, ter git the best hout of this little dog, yer 'usband will 'ave to wear spats an' a tall 'at.

Mrs. Jones: Havo you a speaking acquaintance with that woman next door?

Mrs. Blanks: A speaking acquaintance? I know her so well we don't speak at all.

"The gentleman in No. 13 has sent me a declaration of love."

"I can believe it. He has the unlucky number."—Fliegende Blätter, Munich.

CHAPTER II—Continued.

Fresh from his exercises and shower, his cheeks red, his dark eyes shining with the clear glow of health, his step springy and free, Donald was a picture of rugged health and strength. But for all this apparent outward brightness, inwardly he felt rebellious. Douglas, invitation had brought a great longing for the comforts of his past life. Why should he assume the role of a pugilist to eke out an existence? Why wear shabby clothes and even know the pangs of hunger? He had but to wire his father that he was destitute and plenty of money would be forthcoming.

A big steak at "Old Joe's" furnished him a hearty meal. As he selected the money from his meagre supply of cash to pay his check, Old Joe bent his grizzled head forward. "Don't go hungry; come in any time,"

"Thanks, Joe."

Donald was in a dark mood. He heard the sound of happy laughter coming from a saloon on the corner. There behind those swinging doors was momentary recess from worldly cares. He stood in the door of the restaurant and looked across the street at the twin peaks. Known as the "Lions," which guard the entrance to Vancouver's harbor. The sun was setting in a mass of fleecy clouds; the clouds became a luminous gauze, and a golden splendor spread over the water. The mountains were suffused in violet, while the snow-fields took on a faint stain of rose. Donald's face glowed as he watched.

"Some country," he breathed. He turned to catch a friendly smile from Old Joe as he worked over his range. And some people! he added fervently.

Once more, he turned to the mountains. The glow had vanished and the Lions stood in bold relief against the clear sky. The massive snow-capped peaks seemed to impart a new strength to his being. "I'll not quit. I'm going to make good," he said firmly.

CHAPTER III.

While on his daily run around Stanley Park the next afternoon Donald was attracted by a horse and rider standing on Prospect Point. The rider was interested in a huge white lion plowing her way through the Narrows, bucking a head tide. The horse, a noble animal, with full mane and tail, was restive, rocking and prancing in his eagerness to be off.

When Donald lifted his eyes to the rider, he saw a beautiful, haughty face with skin of a milky whiteness. The heavy mass of dark brown hair, coiled under a trim riding habit, suddenly grew cold.

A shower of dirt and pebbles stung him.

"Oh, Janet," he shouted.

Donald shook an angry fist at his tormentor and sprang to the shelter of the trees. There was a thud of hoofs, a spluttering of gravel, and the sound of creaking leather.

"What in the world are you doing here in that dress, Doug?" asked Janet.

"Janet," said her brother in a low, mysterious voice, "I've got the fellow that tried to flirt with you yesterday; he's in there." He pointed to the bush. "The poor fellow is a confirmed flirt; has it in his worst form. I beg of you, Sister, be lenient, be merciful. He thinks you are a Greek goddess." He tapped his forehead significantly.

Donald cursed the irrepressible youth's sense of humor. If he could have reached the humorist at that moment he would have pitched him into the Inlet without compunction.

Janet eyed her brother with disapproval. "What are you talking about, Doug? Have you taken leave of your senses entirely?"

"I will bring forth the erring knight for you to censure," rejoined her brother, howling low in exaggerated deference. "Ho!" he shouted,

Donald's face as the horse was swung about as though on a pivot and with its rider was off like a wind.

"A thoroughbred," he exclaimed, as he watched the rider until she turned a corner in the drive. "Two of them! And she thinks I am a low-down masher," he added ruefully.

That afternoon he went through fifteen rounds of boxing, finishing strong and fresh to tackle pulleys and punching-bag.

Aady was joyful. "It will never go twenty rounds, me lad. That straight left of yours alone would stop 'im in 'arf that time."

"This is my last day of road-work," remarked Donald to his friend on Friday afternoon, as he slipped on his running shoes.

As he and Douglas neared Prospect Point Donald's thoughts turned to the girl of yesterday. "She was haughty as a princess." Unwittingly he had spoken his musings aloud.

"What's that?" queried his companion.

"I was talking to myself," laughed Donald.

"Bad sign! You are either in love or old age has overtaken you. Too bad!" Douglas wagged his head sadly.

"I may as well tell you," confided Donald; "I saw a Greek goddess mounted on an Arabian charger yesterday."

Douglas threw out his hand triumphantly. "Donald, my poor friend! I am afraid that I hit you too hard in that last round," he said in a voice of mock compassion.

Donald stopped short. "Look!" he cried, pointing excitedly, "there she is!"

"I'll be jiggered!" exclaimed Douglas.

"Don't blame you, but isn't she a peach?" said Donald admiringly.

Douglas burst out laughing. "Do you know who that is?" he asked with a peculiar inflection.

"I told you—a Greek goddess, mount—"

"That's my sister, Janet," interrupted Douglas.

Donald's mouth opened. He stared at his friend. "Your what?" he exploded.

"Oh, I forgot! Poor fellow!" said Douglas, solicitously, as his face assumed a mournful expression. "I'll certainly have to pull my punches hereafter." He leaned toward Donald and placed his lips close to his ear.

"S-i-s-t-e-r," he spelled slowly. "Does the old bean grasp it?"

"Cut the comedy," growled Donald as he jerked Douglas to the side of the road out of sight of the equestrienne. "Good heavens! Your sister!" he groaned, "and she thinks I am a masher."

"Why should she think that of you?"

Donald told him of yesterday's occurrence.

"This is great!" chuckled Douglas. "Come and meet my sister, Donald. I'll tell her that you can't help flirting, and that will fix things up all right. I'll call her." He grinned facetiously.

"Don't you dare! You—" Donald warned.

Douglas avoided Donald's wild clutch, ran to the centre of the road and waved his arm.

"Oh, Janet," he shouted.

Donald shook an angry fist at his tormentor and sprang to the shelter of the trees. There was a thud of hoofs, a spluttering of gravel, and the sound of creaking leather.

"What in the world are you doing here in that dress, Doug?" asked Janet.

"Janet," said her brother in a low, mysterious voice, "I've got the fellow that tried to flirt with you yesterday; he's in there." He pointed to the bush. "The poor fellow is a confirmed flirt; has it in his worst form. I beg of you, Sister, be lenient, be merciful. He thinks you are a Greek goddess." He tapped his forehead significantly.

Donald cursed the irrepressible youth's sense of humor. If he could have reached the humorist at that moment he would have pitched him into the Inlet without compunction.

Janet eyed her brother with disapproval. "What are you talking about, Doug? Have you taken leave of your senses entirely?"

"I will bring forth the erring knight for you to censure," rejoined her brother, howling low in exaggerated deference. "Ho!" he shouted,

leave thy woody bower, Sir Don, the goddess awaits thee."

Seething inwardly, Donald tried to appear dignified as he stepped to the road, but the attempt was a dismal failure. How could one approach anything like dignity when dressed in a pair of running trunks, a torn and frayed jersey, socks turned down over a pair of dirty tennis shoes, and without hat or coat? All this added to the fact that he faced a battery of two big brown eyes, who thought him a masher. The greatest actor in the world would fail to register dignity under such conditions. He had a confused remembrance of a jumble of words that went for a formal introduction. He felt his face hot, and knew he was blushing furiously, which did not add to his composure.

The girl looked down curiously, but not without interest, at the embarrassed young man.

Donald finally mustered courage to glance up at the face above him. The deep brown eyes regarding him held just a trace of humor. The full red lips were parted to show a flash of white, even teeth.

"It is a pleasure to meet you even under such inauspicious circumstances," stammered Donald. He turned to glance at the grinning cause of his discomfiture. "I would suggest, Miss Renée, that you have a doctor waiting at your home, as I intend to commit nymphet on the person of your brother as soon as you have gone."

(To Be Continued.)

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worm infant.

Soak orange peels three days in cold water changing the water daily, then put in hot water, and boil until soft. Drain, wipe dry with cheese-cloth, chop fine, and measure. Take an equal amount of sugar, and for each one-third of a cup of sugar add two tablespoons each of water and butter, and boil until it will spin a thread, then add the chopped peel, boil about five minutes; cool, put on a board, sprinkle with granulated sugar, and shape into small balls. These may be rolled in coarse sugar, and allowed to dry, or they may be dipped in fondant, flavored with vanilla. They are delicious dipped in chocolate with a few grains of orange sprinkled on the top of each chocolate before it hardens.

Tenderloin of Beef Stuffed with Oysters

Large tenderloin.
One pint oysters.
One teaspoon cracker crumbs.
Salt.
Pepper.
Celery salt.

Split the tenderloin. Season with salt and pepper. Make a dressing with the oysters, crackers, and season with salt, pepper, and celery salt. Spread part of the one tenderloin with dressing. Put the other one-half tenderloin on top. Tie together with string and bake. Baste often.

Minard's Liniment—Popular for 50 years.

There is in Fifth Avenue, New York a 12-story apartment building in which every door knob is gold plated. In one flat every hinge, door handle and key is of gold.

Isn't it funny how people entirely without principle manage to draw so much interest?

Agrees with Baby

Eagle Brand Condensed Milk has been used for bottle-fed babies for three generations. Write The Borden Company Limited, Montreal, for Free Feeding Charts and Welfare Booklets.

Great Lakes "Gambling" Season

The "gambling" season of the Great Lakes is near at hand. Stakes that mount to millions and involve the lives of men are on the play boards of the shippers who soon will be sending their mighty grain and ore carriers to fetch that last cargo of the season and in doing so they stake their ship and the lives of the men against the elements which only last year claimed five ships as victims and cost the lives of 24 men and two women.

Dietitians "Yes, a few lettuce leaves without oil, and a glass of orange juice. There, madam, that completes your daily diet."

Mrs. Overweight: "Thank you so much, Doctor, but do I take this before or after meals?"

First Bachelor: "Is there anything in this affair of yours with the heiress?"

Second Same: "Millions, I hope."

Inspiration From Commonplace Things

Door-Knocker Gave Beethoven Idea for Glorious Concerts

To an ordinary mind it would be scarcely seem possible that such music could be got out of a door-knocker. Yet it was this sound which is said to have inspired Beethoven's glorious violin concerto in D. As the musician lay awake one night shaping the concerto in his mind, his musings were interrupted by a belated neighbor who was endeavoring to rouse his housekeeper and get her to come down and let him in. Beethoven heard his persistent knocking for admission—four slow deliberate knocks at a time. The constant repetition gave the composer the idea he sought and those four knocks are heard all through the opening movement of the concerto, which begins with four unaccompanied D's on the drum—seemingly as unmelodious and unpromising an opening phrase as one could imagine. In commenting upon the circumstances Sir George Grove has said "those four knocks were to Beethoven what the hulk of the old Temeraire was to Turner, or the daffodils to Wordsworth—commonplace in themselves but transmuted by the fire of genius into an imperishable monument."

(To Be Continued.)

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worm infant.

Soak orange peels three days in cold water changing the water daily, then put in hot water, and boil until soft. Drain, wipe dry with cheese-cloth, chop fine, and measure. Take an equal amount of sugar, and for each one-third of a cup of sugar add two tablespoons each of water and butter, and boil until it will spin a thread, then add the chopped peel, boil about five minutes; cool, put on a board, sprinkle with granulated sugar, and shape into small balls. These may be rolled in coarse sugar, and allowed to dry, or they may be dipped in fondant, flavored with vanilla. They are delicious dipped in chocolate with a few grains of orange sprinkled on the top of each chocolate before it hardens.

Tenderloin of Beef Stuffed with Oysters

Large tenderloin.
One pint oysters.
One teaspoon cracker crumbs.
Salt.
Pepper.
Celery salt.

Split the tenderloin. Season with salt and pepper. Make a dressing with the oysters, crackers, and season with salt, pepper, and celery salt. Spread part of the one tenderloin with dressing. Put the other one-half tenderloin on top. Tie together with string and bake. Baste often.

Minard's Liniment—Popular for 50 years.

There is in Fifth Avenue, New York a 12-story apartment building in which every door knob is gold plated. In one flat every hinge, door handle and key is of gold.

Isn't it funny how people entirely without principle manage to draw so much interest?

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The Saskatchewan Dental Society

TOOTH TURNS BLACK

Your white pearly teeth have perhaps excited the admiration of your friends and your pride in them is fairly pardonable.

But one day a tooth that you had been intending to have "fixed" ceased to bother you until by and by you noted with some little alarm that this tooth was quite dark in contrast to its fellows.

Or, perhaps, your dentist because of your neglect found it necessary to remove the pulp from a tooth, following which operation you found with some dismay that it had changed color, and noticeably so.

Now, what has caused it?

Contrary to your idea, possibly, a tooth gets its shade, not from the outer enamel covering, which is almost colorless, but from the array of colors in the underlying body of dentine.

As a sequence to pulp death and decomposition, we have a disintegration of the blood elements with the production of pigments or color compounds. These permeate the dentinal structure through its many little tubuli and are reflected through the almost transparent enamel, giving the tooth its shade; this is the principal source of discoloration.

A less frequent cause is from the use of remedial agents employed in tooth treatments, many of which have the property of staining the dental substance.

Now, unfortunately, as you can see, all of the scouring that you may do is of no avail—like the historic spot of "Macbeth"—it will not "out."

However, your dentist by employing bleaching agents within the tooth cavity can with fair success restore the shade, if the discoloration has not remained too long.

Tourists Aid Development

The tourist is often the forerunner of the homemaker and investor. He visits the country and sees with his own eyes the character of its people and resources, and if he later returns to settle or invest he is able to do both in a more satisfactory manner.

Romans Understood Method of Soldering

Sample of Work on Iron Ferrule Discovered in Ancient City

A method of soldering two pieces of iron together with copper was known to Roman artisans in England nearly two thousand years ago.

This is shown by a "deep iron ferrule" like a modern servitor ring unearthed during excavations of the Roman city of Uricum, located in the river Severn and destroyed about A.D. 350.

Lead pipe manufactured and laid in Rome's water system 1,800 years ago was recently pronounced to be in perfect condition.

THE EASY WAY

Thousands need cod-liver oil to increase vitality and build up resistance.

Scott's Emulsion

is the easy and pleasant way to exact the most out of cod-liver oil to reinforce your body with strength to build resistance.

Scott & Bowne, Toronto, Ont.

Little Helps For This Week

"Thou hast dealt well with Thy servant, O Lord, according unto Thy word."—Psalms cxix, 65.

Beneath the splendor of Thy choice, Thy perfect choice for me I rest; Outside it now I dare not live, Within it I must needs be blest.

Jean Sophia Pigott

I would rather be what God chose to make me than the most glorious creature that I could think of. For to have been thought about, born in God's thoughts, and then made by God, is the dearest, greatest, most precious thing in all thinking.

George MacDonald.

Stage Manager (to new hand) — "Now then, everything's ready. Run up the curtain."

Stage-Hand — "Wot yer talkin' about? Run up the curtains? I'm a stage-hand, not a bloomin' squirrel."

Charleston Dance Contest Judged By England's Leader

Miss Leslie—Sutton, chief judge of the Charleston contest for England, writes: "My unique position in the dancing world today would never have happened if I had not taken care of my health."

I constantly had that tired out, depressed feeling, with sick headache, indigestion, biliousness caused by the poisons of constipation.

Your mild laxative has been of valuable assistance in keeping my system in a daily healthy condition.

EVEREADY Radio Batteries —they last longer

Try It Yourself, Too!
You Can See Why a Layerbilt
Lasts Longer

We would hardly advise you to tear up a new Eveready Layerbilt to find out why it lasts longer—but after you have finished one of these batteries, pull it apart!

You'll see how solid with current-carrying elements it was—and how evenly the wide plates of carbon and zinc wore away, giving the last bit of energy before your Layerbilt finally "signed off."

You'll marvel at the great improvement over the old types of batteries with their round cell construction—and we know that you'll be satisfied that the long life and economy of your Layerbilt was not just a lucky accident or a mystery, but a certainty of long service and economy based on scientific construction, which you can count upon with every Eveready Layerbilt "B" Battery.

MEDICINE FOR YOUNG GIRLS

Mothers Endorse Lydia E. Pinkham's Vegetable Compound

My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound for weakness and pains. She could not go about much with the other girls as she was so weak and pale. We got six bottles and it did her a great turn. She's working out now in a store and walks three miles every morning and back in the evening. Mrs. MARY VANCE, 44 Logan Road, Sydney, N. S.

Pinewood, Ont.—"I constantly had pains in my back and side and spent two days in bed every month. I have taken three boxes of Lydia E. Pinkham's Vegetable Compound Tablets. They have done me good and I always have them in the house. I have recommended your good medicine to several friends and have given it to my 17 year-old girl." Mrs. ALBERT OUBERT, Pinewood, Ontario.

M. I. A. Contest Rules

The following are the general rules governing the preliminary contest in the Taylor Stake M. I. A. for 1928—29:

1. For all preliminary events, contestants must be enrolled in the M. I. A.
2. Preliminary events may be given in sacrament meeting or any ward M. I. A. joint meetings or socials. (this does not include house parties nor officers meeting.)
3. All preliminary events for each month must be reported in writing to the stake secretaries by the 10 of the following month or ere it will not be given.
4. Time of contest is from November 1 until January 31.
5. Age for contestants is:
 - a. Boy scouts, 12 to 14 years inclusive on June 1, 1928.
 - b. Junior boys, 15 to 16 years inclusive on June 1, 1928.
 - c. M men, 17 to 23 years inclusive on June 1, 1928.
 - d. Bee hive girls, 14 to 15 years inclusive on June 1, 1928.
 - e. Junior girls, 16 to 17 years inclusive on June 1, 1928.
 - f. Gleaner girls, 18 to 23 years inclusive on June 1, 1928.
 - g. Adults, 24 years and over.

- Events for Preliminary
1. M men's public speech.
 2. Gleaner girls public speech.
 3. Junior boys public speech.
 4. Retold story or reading by junior girls.
 5. Retold story or reading by boy scouts.
 6. Double mixed quartette, open.
 7. M men's quartette.
 8. Bee hive girl's chorus.
 9. Ladies double trio, junior and gleaners.
 10. Organ solo, open.
 11. Harmonica band, boy scouts.
 12. Dance orchestra with at least five pieces, open.

The finals in the contest work will be announced later.

The Chautauqua program to be played here during the second and third weeks in November carries a varied program of rare talent. Paramount among these is the play entitled "Let's Go Somewhere" to be presented the first night. This is a three-act comedy by Robert Merrill Sand. It is a story of modern home, in which the currents of the old and new meet in tragic-comic conflict. A beautiful love story with a happy ending and a moral for those who care to look for it. It is probably the most up-to-date play being given today. It deals with the problems of the modern life with which we are familiar. Many young people who see this play will, as it were, be looking into a mirror and seeing a true reflection of themselves.

News Notes

Preparation are being made by the second ward mutants for a big Halloween snapper dance in the Opera House on Wednesday, October 31.

Mrs. A. W. Kirkham entertained the Athenian Club on the occasion of her birthday last Wednesday evening. About 12 guests were present. A chicken dinner was served that the guests report, will linger long in their memory.

Miss Dora Peterson, of Kimball, died suddenly at the Cardston hospital last Monday. Death was caused by heart failure. Miss Peterson is the daughter of John Peterson, formerly Bishop at Welling.

FOR SALE—Practically new Folding Couch and Mattress cheap.—Apply Mrs. Edgar Nilsson, phone 120.

Wife and mother—and then, by one swift stroke of fate, an outcast. Accusing fingers driving her to despair, this woman whose emotions tore her will to shreds. A living death, seemingly perpetual remorse—but always hope and finally salvation—a new, untired salvation. See Poh Negri in "Three Sinners" tonight at the Capitol.

FOR SALE—House and lot with clear title. Half cash and the balance in monthly payments or trade.—Apply Recorder office.

The death of Steve Kormos occurred last Sunday night from heart failure. He came home from work at the sugar factory and retired for the night feeling perfectly normal, and was found in his bed Monday morning, dead. He leaves a wife and three children, who just recently came over from Hungary to join Mr. Kormos. Internment was made in the local cemetery.

WANTED—Board and rooms, and light housekeeping accommodations for School of Agriculture students. Write Principal O. S. Longman at the School stating rates per week and the amount of accommodation.

AUCTION SALE OF SCHOOL LANDS

PUBLIC NOTICE is hereby given that auction sales of School Lands will be held in the province of ALBERTA at the places and on the dates and including the territories hereafter mentioned:—
LETHBRIDGE

Monday, November 19th, 1928, at 9 o'clock a. m., comprising Tps. 1 to 13 inclusive, Rge. 14 to 19 inclusive, W. 4th M., Tps. 6 to 13 inclusive, Rges. 20 to 26 inclusive, W. 4th M. and Tps. 6 to 10 inclusive, Rge. 27, W. 4th M., to Rge. 2, W. 5th M. inclusive.
CARDSTON

Thursday, November 22nd, 1928, at 9 o'clock a. m., comprising Tps. 1 to 5 inclusive, Rge. 20, W. 4th M. to Rge. 2, W. 5th M. inclusive. The sales will convey the surface rights only and will be subject to the usual reservations in favor of the Crown.

The lands will be offered in quarter-sections, or portions thereof, subject to a certain upset price in each case, and will be sold without regard to persons who may be in illegal occupation of same, but such persons will be allowed a period of thirty days from date of sale within which to remove any improvements they may have placed on the land, which are not the property of the Crown.

Where land sold has been put under cultivation by the holder of a permit or any other person, the sale is subject to the right of the permit holder or said person to remove prior to the 31st December, 1928, the crop grown thereon.

Where land sold is held under grazing permit, such permit will become inoperative on the date of sale.

Where a parcel of land is sold, the holder of a cultivation or grazing permit thereon will be allowed until the 15th day of May, 1929, within which to remove therefrom any fencing or other improvements not the property of the Crown,

placed upon such land under the provisions of said permit.

A purchaser shall at time of sale, or upon demand of the Department pay for any area in summerfallow upon the land at the date of sale at a valuation placed thereon by an official of the Department.

TERMS OF PAYMENT.

One tenth in cash at time of sale and the balance in eighteen, equal, annual instalments with interest at the rate of six per cent per annum on the balance of the purchase money from time to time remaining unpaid, except in cases where the area of the land sold does not exceed forty acres, in which cases the terms of payment shall be one-fifth in cash and the balance in four, equal, annual instalments, with interest at the rate of six per cent per annum; overdue payments whether of principal or interest, to bear interest at the rate of seven per cent per annum. **SCRIPT OR WARRANTS WILL NOT BE ACCEPTED IN PAYMENT.**

Upon a parcel of land being knocked down, the purchaser shall immediately pay to the Clerk of Sale the amount of the first instalment; otherwise the parcel will at once be put up again.

Payments may be made in cash or by a marked cheque on any chartered bank of Canada, made to the purchaser's own order and payable at par at the point of sale.

Purchasers may, at the time of sale, pay in full or any amount desired in excess of first instalment. **CHEQUES WILL NOT BE TAKEN IN PAYMENT. UNLESS MARKED ACCEPTED BY THE BANK ON WHICH THEY ARE DRAWN.**

Lists, giving full particulars of the lands to be offered, may be had on application to the Acting Commissioner of Dominion Lands, Department of the Interior, Ottawa, Ontario, or any agent or sub-agent of Dominion lands in the Province of Alberta.

N. B.—For sales in other districts, see posters in Post Offices.

By Order,
J. W. MARTIN,
Acting Commissioner
of Dominion Lands.
**DEPARTMENT OF THE
INTERIOR, OTTAWA, 1928**
